EDUCATION

Scaler

DSA and Web Development

Online

Oct 2022 – May 2024

Hindustan College of Science and Technology

CGPA 7.6, B.Tech - Electronics and Communication

Mathura, UP

July 2017 – June 2021

PROJECTS

Personal Finance Tracker | |

- Developed a Personal Finance Tracker application using React and Redux Toolkit, enhancing users' ability to manage and visualize finances effectively.
- Implemented core features like user authentication with Firebase, income and expense tracking, data visualization with Victory.js, and CSV import/export, boosting financial management efficiency by 35%.
- Designed a responsive UI for seamless performance on desktop and mobile, resulting in a 30% increase in user engagement.
- Utilized tech stack:** React, Redux Toolkit, Firebase, Victory.js, React Router DOM, React Toastify, PapaParse.

Contacts API |

- Developed a RESTful API using Node.js and Express to manage a contacts list with full CRUD functionality.
- Implemented endpoints to add, retrieve, update, delete, and search contacts by name, type, or phone number.
- Ensured data validation, including mandatory fields and enforcing a 10-digit phone number rule.
- Designed a JSON-based storage system for simplicity and portability.
- Utilized tech stack:** Node.js, Express.js, JavaScript, JSON.

Multi-Chain Wallet | |

- Built a React-based application to generate and manage Ethereum and Solana wallets from a single mnemonic phrase.
- Implemented HD wallet functionality for both chains using BIP39, ethers.js, and Solana Web3 libraries.
- Added features to derive multiple wallet addresses, display public/private keys, and fetch real-time balances via Alchemy APIs.
- Designed a responsive and intuitive UI with Tailwind CSS, including mnemonic display, wallet lists, and balance modals.
- Integrated Redux Toolkit for state management of Ethereum and Solana wallets.
- Utilized tech stack:** React, Redux Toolkit, Tailwind CSS, ethers.js, @solana/web3.js, bip39, ed25519-hd-key, tweetnacl, Axios.

EXPERIENCE

Graduate Engineer Trainee

Huawei Technologies

Sep 2021 – Oct 2022

- Monitored alarms on U2000, achieving 100% Ticket Tracking Quality per customer SLAs.
- Resolved over 100 customer complaints via calls and emails, ensuring high customer satisfaction.
- Ensured compliance with Information Security and Cyber Security laws when handling confidential data.
- Optimized project performance by leveraging comprehensive knowledge of all project tools and methodologies.

SKILLS

Programming Languages: Java, SQL, HTML, CSS, JavaScript, TypeScript

Front-End Development: React, Redux, Tailwind, Bootstrap

Back-End Development & Databases: Node.js, Express.js, MySQL, MongoDB, RESTful API, JWT

Tools & Version Control: Git, GitHub, Postman
